Overall Height:

12.000 inches

Overall Diameter:

38.000 inches

Tempurature Rating:

425.00 degrees fahrenheit

Wattage Rating:

2.00 kilowatts

Heating Element:

Included

Product Name:

Heater-fan case, 1st stage fan air seal tip shroud fit

Phase:

Single

Frequency In Hertz:

60.0

Functional Description:

Used to heat the fan case's 1st stage fan air seal tip shroud fit, prior to installing the 1st stage fan air seal tip shroud. Task can be performed horizontally or vertically. Use with controller pwa61685 or pwa25672. The fan case should be insulated with pwa500051, insulating blanket, cip task 578suppgreplaces pwa57825 for this task; pwa57825 will remain in use for four of its orginial seven functions where the heating element is close enough to the cases to perform the tasks
