End Application:

F100-pw-100/200/220/220e aircraft engine

Nominalheight:

7.000 inches

Nominaldiameter:

30.000 inches

Special Features:

Circular configuration (steel base); company item name-fixture, machine- inner fairing intermediate case

Functional Description:

Used to clock, roundup, and hold proximate splitter inner fairing on a cnc machine

Unpackaged Unit Weight:

100.000 pounds

Reference Data And Literature:

Serd no. 8630

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
