End Application:

Aircraft, freedom fighter f-5

Specific Usage Design:

Cutouts on the item allows for the faulty p1 connector to be precisely removed and a replacement p1 connector to be installed

Nominal length:

22.000 inches

Nominal width:

12.000 inches

Nominal height:

1.3800 inches

Special Features:

Constructed from .200 thick, type gee, nema g-10/fr-4 glass reinforced epoxy. Cutouts included to eliminate interface with components on the circuit card during the alignment process. Uses two tapered pins to provide positive alignment with the circuit card.

Functional Description:

Used as a means to precisely mount and remove the p1 connector on the d2 ipcb assembly

Unpackaged Unit Weight:

5.000 pounds

Reference Data And Literature:

Serd no. 0059

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
