**End Application:**

F100-pw-229 aircraft engine

**Nominalheight:**

7.000 inches

**Nominaldiameter:**

28.000 inches

**Special Features:**

Kcircular steel base plate with a center bore & masking post, (10) segment rail locators, clamp holers with clamp hooks, and stop locating dowels; company item name-fixture, shotpeen weld repair 9th stage stator

**Functional Description:**

Used to position and hold a set of (10) 9th stage stator segments during shotpeen of weld repaired featherseal slots located at segment ends

**Unpackaged Unit Weight:**

275.000 pounds

**Reference Data And Literature:**

Serd no. 8805

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A505c0
