End Application:
F100-pw-229 aircraft engine
Nominalheight:
7.000 inches
Nominaldiameter:
28.000 inches
Special Features:
Kcircular steel base plate with a center bore & masking post, (10) segment rail locators, clamp holers with clamp hooks, and stop locating
dowels; company item name-fixture, shotpeen weld repair 9th stage stator
Functional Description:
Used to position and hold a set of (10) 9th stage stator segments during shotpeen of weld repaired featherseal slots located at segment ends
Unpackaged Unit Weight:
275.000 pounds
Reference Data And Literature:
Serd no. 8805
Shelf Life:
N/a
Unit Of Measure:

Demilitarization:
No
Fiig:
A505c0
