End Application:

F-100-pw-100/200/220/220e

Nominal length:

11.000 inches

Nominal width:

6.000 inches

Nominal height:

3.300 inches

Special Features:

Fixture, checking-6th stage blade compressor rotor length

Functional Description:

This checking fixture is recommended to inspect the length of the 6th stage compressor rotor blade from the root "z" plane to the blade tip at two locations 1/8 inch from the leading and trailing edge

Unpackaged Unit Weight:

32.000 pounds

Reference Data And Literature:

Serd9051, t.O.2j-f-100-13-7-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
