End Application:

Pacer special, b-2acft

Usage Design:

Individual hydraulic units

Installation Design:

Fixed

Engine Driven Hydraulic Pump Testing Design Feature:

Not included

Product Name:

Ground input unit test stand

Special Features:

C/osteel fixture, a plate 50inches long 20 in wide with vertical members supporting a dynamometer, two couplings, a torque sensor, a magnetic pickup and the giu unit under test. Height 23 in weight 200lbs bolted to a work bench. And a test console with four digital meters, a current transducer, and a hard wired electrical cable that mates with the electrical connector on the giu for monitoring and control

Functional Description:

Provides a means to perform load and no-load testing of the giu and allowing a visual verification of the directional rotation of the manual input shaft on the input end of the giu

Reference Data And Literature:

F3460187c1329, serd 2700

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T361-e
