Major Components:

Decade resistor

End Application:

C-40 support equipment

Inclosure Feature:

Multiple item w/carrying case

Test Type For Which Designed:

Decade resistance for total air temp sensor

Functional Description:

Used during test of the air data system; consists of a decade resistance box which is connected together with a decade resistor in place of the total temperature probe; used on aircraft equipped with rosemount inc. Total air temp sensor p/n 102je2fg

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
