Overall Length:

24.000 inches

Overall Height:

1.140 inches

Overall Width:

23.000 inches

End Application:

F404 engine

Criticality Code Justification:

Agav

Product Name:

Adapter trunnion, ai

Special Features:

A split trunnion ring of aluminum configured to fit around the hpc rotor between stages 4 & 5 with two stainless journals at 90 degrees to the split line and two eyebolt assemblies for clamping the two halves together

Material:

Stainless steel and aluminum

Surface Treatment:

Anodize

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
