Overall Height:

58.0 millimeters

Overall Diameter:

Between 34.0 millimeters and 58.0 millimeters

End Application:

Ae2100d3 turboprop engine

Special Features:

This valve is especially designed and patented for use with the npp.System, two valves are required in each cover and they are connected to the npp system, controller via special hoses. One valve is used to extract air from the cover and the other to inject nitrogen gas

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
