Overall Height:
58.0 millimeters
Overall Diameter:
Between 34.0 millimeters and 58.0 millimeters
End Application:
Ae2100d3 turboprop engine
Special Features:
This valve is especially designed and and patented for use with the npp.System, two valves are required in each cover and they are
connected to the npp system, controller via special hoses. One valve is used to extract air from the cover and the other to injectnitrogen gas
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
