**Overall Height:**

58.0 millimeters

**Overall Diameter:**

Between 34.0 millimeters and 58.0 millimeters

**End Application:**

Ae2100d3 turboprop engine

**Special Features:**

This valve is especially designed and patented for use with the npp.System, two valves are required in each cover and they are connected to the npp system, controller via special hoses. One valve is used to extract air from the cover and the other to inject nitrogen gas

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
