Overall Length:

28.200 inches

Overall Height:

5.100 inches

Overall Width:

28.200 inches

End Application:

F100-pw-229 engine

Special Features:

Mask is required for plasma spray repair of 10th-12th stage compressor stator segments, ref 4083880, having a worn snap diameter of outer hook. Mask is used with stator segments installed in pwa72418 fixture. Mask halves fit under the outer segment hook with lower end of mask resting on pwa72418 fixture base to protect the od of the stator segments from plasma overspray. Pwa7241 (top) and pwa72420(hook rail) complete the masking

Reference Data And Literature:

Serd no 9064
