End Application:

Alarm, chemical agent auto

Special Features:

Tool is a precision alignment pin that expands to tighten up hole clearance. Pin is an assembly of female split bushings separated by male segments on a center spindle that expands when drawn together. Pin is approximately 0.386 inches diameter with a crop length of approximately 1 inch. One end features a hex nut and a washer. The center spindle has an internal hex socket on the same end as the hex nut. In expand, hold the center spindle stationary with a 0.125 hex key while tightening the hex nut with a 0.562 open-end wrench. Components are either 17-4 ph stainless steel or alloy steel with black oxide coating
