End Application:

F/a18-e/f

Specific Usage Design:

Intermediate maintenance on separating and re-installing the two 65kva generators from the tube flange and used to remove the rotor assembly from the stator housing at the depot level

Nominal length:

9.500 inches

Product Name:

Fixture, aircraft maint generator/rotor removal

Nominal width:

9.500 inches

Nominal height:

9.500 inches

Special Features:

Matl descrip-alum./stainless steel

Functional Description:

To sep & re-intall the gen from/to converter tube flange

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
