Overall Length:

18.000 inches

Overall Height:

5.000 inches

Overall Width:

12.000 inches

End Application:

F/a-18am se

Criticality Code Justification:

Agav

Product Name:

Agcs ancillary set

Special Features:

The automated gyro/gimbal control system (agcs) ancillary set consists of an agcs assembly, a power cable, an ethernet cable, a shorting plug, and a worksurface adapter. The agcs provides capabilities to control and monitor gyro/gimble systems in a real-time closed loop system during tps execution. This capability is not currently available with the existing cass system. The agcs ancillary set is ancillary to the cass eo plus station and is not required at all sites.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
