End Application:

F100-pw-229

Nominallength:

29.375 inches

Product Name:

Fixture, machine

Nominalheight:

10.625 inches

Special Features:

7serd name fixture, machine, 10th-12th stage compressor stator; fixture has two set up options, inner diamet machining with block towers in place and center ring removed or outer diameter machining with center ring installed and block towers removed

Functional Description:

Used to locate, secure and back-up a set of 12 stator segments in a full ring during machining operations

Reference Data And Literature:

Serd 9059; t.O. 2j-f100 53-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A505c0
