End Application:

Cable assembly

Product Name:

Cable assembly wat sparrow interface - w9

Special Features:

Hwire color per mil-std-681, solder per mil-std-2000a using qq-s-571 type sn63 solder, wiring innstallation per mil-w-5088, crimp contacts per tensile and electrical requirements of mil-c-22520, hot stamp markings per mil-m-81594 color white .12 inch high min, crimp terminals and splices per tensile and electrical requirements of mil-t-7928, install heat shrinkable sleeving per mil-l-23053, all conduit threaded couplings tightened to min reccomended value of 45 inch-pounds, test assembly for insulation breakdown at 500 vdc or vac-5 sec max- between all terminals not common and between terminals and connector shell leakage resistance at test voltage to be greater than 10 megohms, seal conduit coupling thread per mil-s-22473 compund h primer n or t, install find nno.47 sheild terminating splice per mil-s-83519, apply adhesive per mil-a-46146 group i type i color clear to mating surfaces of find no 1 and fin no 9, before install find no 51 seal connector per mil-s-8516

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
