End Application:

F117-pw-100 engines

Nominal length:

9.000 inches

Nominal width:

4.000 inches

Nominal height:

4.000 inches

Special Features:

Requested name-simulator-hpc- variable stator vane pin wear

Functional Description:

Estimate variable stator vane retaining pin wear by simulating vane arm movement caused by worn pins

Unpackaged Unit Weight:

3.000 pounds

Reference Data And Literature:

Serd number 23p118

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
