End Application:

F100-pw-229 turbofan engine

Nominalheight:

5.000 inches

Nominaldiameter:

40.000 inches

Special Features:

Serd name: weld 3rd stage compressor stator fixture

Functional Description:

Used for weld repair of 14 antirotation lugs tab wear on 3rd stage compressor stator 4075983. Outer diameter snap on base locates and rounds up the forward diameter snap of the stator

Reference Data And Literature:

Serd 9261

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
