**End Application:**

F100-pw-100/200/220/220e engines

**Nominalheight:**

5.500 inches

**Nominaldiameter:**

32.000 inches

**Special Features:**

Fixture is installed on a horizontal boring mill to machine lugs, manufacturers name fixture, machine, 1st stage turbine stator support outer

**Functional Description:**

Used with master gage pwa72325, to locate, clock, and hold the 1st stageturbine stator outer support for finish machining of weld repaired support lugs

**Unpackaged Unit Weight:**

350.000 pounds

**Reference Data And Literature:**

Serd8946

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A505c0
