End Application:

F100-pw-229 engines

Nominal length:

13.000 inches

Nominal width:

13.000 inches

Nominal height:

7.500 inches

Special Features:

Requested name-fixture, machine-number 4 bearing airseal aft snap diameter

Functional Description:

Used to secure the airseal during plasma prep and finish machining. It is supplied with a split ring clamp and chuck master

Reference Data And Literature:

Serd number 9218

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
