**End Application:**

F/a-18

**Product Name:**

Tool, installation

**Special Features:**

Tool set contains a body tool, pin extraction tool, a pin installation tool, and a striker. The three tools are threaded at the end to engage internal threads of the pin or the restrictor as required. The striker slides on the shaft of either of the first two tools and is used to strike the head, thus driving out the restrictor body. The body tool is also used to push the rfi restrictor insert firmly into the reamed bore of the manifold. The pin installation tool is then used to press the expander pin into the restrictor body so that the external lands bite into the cavity wall to seal and lock the insert in place.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
