End Application:

F100-pw-100/200/220/220e

Nominal length:

2.500 inches

Nominal width:

2.800 inches

Nominal height:

1.700 inches

Special Features:

Requested name-fixture, test strip 4th stage turbine air seal

Functional Description:

Required for inner flange shotpeen of 4th turbine air seal p/n4086505, consists of (3) pwa32704 test strip block details that simulate the face locations/elevations of the air seal inner diameter flange

Unpackaged Unit Weight:

20.000 pounds

Reference Data And Literature:

Serd number 9410

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
