End Application:

F/a-18 & f/a-18e/f aircraft support equipment

Criticality Code Justification:

Agav

Functional Description:

The aluminum fixture is comprised of top and bottom plates with 2 support plates in between them, the plates are bolted together after the manifold is secured within by means of 2 hook clamps on one end and a v-block on the other. The support plates have machined cutouts for access to the various relief valves in the hydraulic servocylinder that actuate the flight control surfaces

Reference Data And Literature:

Serd no 6382

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
