End Application:

F110-ge-100, f110-ge-129/400, f118-ge-100 engines

Nominalheight:

4.000 inches

Nominaldiameter:

23.000 inches

Special Features:

This item c/o four rings, base ring, centering ring, top plate, split ring; company item name-fixture, machining-seal air stage 1 lpt stator

Functional Description:

Used to restore dimensions of the low pressure turbine stationary air seal; used to locate and provide support for machining dimensions

Unpackaged Unit Weight:

100.000 pounds

Reference Data And Literature:

Serd no. 6404

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
