Aircraft Engine Maintenance Machining Fixture - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4920-01-496-5471

End Application:
F110-ge-100, f110-ge-129/400, f118-ge-100 engines
Nominalheight:
4.000 inches
Nominaldiameter:
23.000 inches
Special Features:
This item c/o four rings, base ring, centering ring, top plate, split ring; company item name-fixture, machining-seal air stage 1 lpt stato
Functional Description:
Used to restore dimensions of the low pressure turbine stationary air seal; used to locate and provide support for machining dimensions
Unpackaged Unit Weight:
100.000 pounds
Reference Data And Literature:
Serd no. 6404
Shelf Life:
N/a
Unit Of Measure:
<del>-</del>
Demilitarization:
No
Fiig:
A505c0
