Overall Length:

18.000 inches

Overall Height:

10.000 inches

Overall Width:

10.000 inches

End Application:

F/a18-e/f

Heating Element:

Included

Special Features:

Electrical, nonimmersion will be used to provide the capability of installing and removing the generator assembly back into the converter unit; tube flangeheater heats up the generator cavity for the install and removal of the pressure kit generator during i-level maint

Supplementary Features:

Used on f/a18-e/f power generating system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T276-d
