Overall Length:

29.700 inches

Overall Height:

18.900 inches

Overall Width:

18.900 inches

End Application:

Cass test station (ate) an/usm63 (v4) sse

Accessory Components And Quantity:

Weldment housing 1; id assembly single tier (back panel) 1; front cover 1; emi gasket 1; bow handles 2

Criticality Code Justification:

Agav

Product Name:

Inavy)calibration otps, interface device

Special Features:

Aa passive device that provides a signal path for instruments functin signals so calibrated measurement and stimulus signals can be routed to and from the cass instruments and embedded standards

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
