End Application:

Maintenance frame a

Nominallength:

97.130 inches

Product Name:

Maintenance frame adapter

Nominalwidth:

22.250 inches

Nominalheight:

14.000 inches

Special Features:

The maintenance frame adapter is designed to adapt to existing shipboard facilities, to enable the suspension of the pod for maintenance actions. It consists of a steel weldment, with provisions to install / remove the pod using existing hlu-288/e bomb hoists in either a dual hoist or single hoist configuration, it also is designed to meet the shipboard shared reconnaissance pod -sharp- shock and vibration requirements

Functional Description:

Used to perform maintenance actions such as sensor installation removal, environmental control system installation removal, routine maintenance, etc.

Unpackaged Unit Weight:

300.000 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
