**Overall Length:**

18.500 inches

**Overall Height:**

7.250 inches

**Overall Width:**

14.000 inches

**Dc Voltage Rating:**

9.0 volts

**End Application:**

F-15c-2-28gs-00-1

**Adjustment Method:**

Rotary switch

**Test Item Connection Method:**

Cable

**Switch Quantity:**

2

**Product Name:**

F15 fq interface unit

**Functional Description:**

Used in combination with a psd30-2af dc capacitance tester or psd90-1c ac/dc capacitance tester to measure the capacitance or insulation resistance of any tank or fuel probe. Operates as stand-alone to simulate internal or external full tanks and low level or fuel shutoff thermistors

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A537k0
