End Application:

Adapter set test

Product Name:

Air data test set

Special Features:

This set is required to provide detailed performance and diagnostic requirements for the central air data computer and pneumatic sensor assembly lrus as defined by their corresponding test requirements document. These requirements are lru test idadc: pneumatic range : 1.153 to 70.743" hg, airdata test set capabilities are pneumatic range, 1.0 to 103"hg. The lru test psa: pneumatic range: 1.153 to 70.744"hg and the air data test set capabilities are pneumatic range: 1.0 to 103"hg

Reference Data And Literature:

Serd 90a52, age index - aa-9.3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
