End Application:

F101-ge-102 engine aircraft age.

Product Name:

Adapter kit, test cell depot

Special Features:

The current 3c3989g01 test cell adapter kits will be upgraded to test f101-ge-102 engines equipped with a digital electronic control

Functional Description:

Used to functionally checkout f101-ge-102 engine after overhaul that are equipped with either a digital electronic control or a combination augmenter fan temperature control and control integrated test system processor by operationg it to an applicable tech ord er; c/o kit, control and instrumentation p/n 9456m10; mechanical assembly, test cell (f101-ge-102) p/n 9456m76; probe kit p/n 9457m45; flex-bed, engine transfer p/n 9459m70

Reference Data And Literature:

Serd 0523

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
