End Application:

Aircraft, mcdonnell douglas co., harrier mk 3

Nominallength:

1.750 inches

Product Name:

Tool, space setting

Nominalwidth:

1.750 inches

Nominalheight:

1.000 inches

Special Features:

Item made out of corrosion resistant steel 440c

Functional Description:

To aid in properly positioning the jet in the torque motor assembly feedpipe of the 975154-2 env's of the 3837000-5 flap controller hydraulic module, prior to soldering

Unpackaged Unit Weight:

1.000 pounds

Reference Data And Literature:

Mcdonnell douglas co. Support equipment recommendation dat (se) no. 1836

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
