Overall Length:

4.552 feet

Overall Height:

4.667 feet

Overall Width:

2.417 feet

Assembly Form:

Rigid

End Application:

J85-5 engine, f-108

Work Holding Device Position Adjustability:

Adjustable

Product Name:

Stand, electronic runout, compressor stator

Special Features:

C/o table, rotating fixture, probes, touch screen computer and printer- supersedes 4920-00-050-9822 p/n 21c3112p010 and 4920-01-066-8850 p/n 21c3004p012

Functional Description:

Electronic stand measures the radii of the compressor stator lands and vane tips to establish stator to rotor clearances

Reference Data And Literature:

Serd 9997

Supplementary Features:

Used with master fixture p/n 21c6318g01

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T361-c
