Product Name:

Test station, electrical-electronic equipment

Special Features:

Multi-frame, rack mounted set of computer controlled test instruments ainterface connectors. A customizable, vxi-based system utilizing system checkers; a teststudio project (tsp) enabling teststudio to execute self-tests on instruments. Provides templatesenabling test programmers to build customixed self-tests for third party instruments and provides diagnostic capabilities to maaximize reuse of existingtest program set hardware. Enables uers to develop and execute test program s for circuit baords and subsystems

Functional Description:

Used for testing b-b1 electromechanical power

Reference Data And Literature:

T.O. 33d7-38-330-1

Relationship To Similar Equipment:

Similar to s9-100-66 which are intermediate level test

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
