Overall Length:

96.000 inches

Overall Height:

57.000 inches

Overall Width:

24.000 inches

Pressure Rating:

300.0 pounds per square inch

Voltage In Volts And Current Type:

110.0 ac

Special Features:

Serd no. 1568. Description consists of a regulate and control test cart that contains all the required valves, controllers, mounting system and data measurement systems to perform actuator testing per the national water life test specification. Depot repair tinker afb. End item tf39 engine

General Description:

Aa facility provided elevated pressure and elevated temperature air system is required to provide the required conditions. The system will regulate and control to the required test requirements.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
