Fuel Control System Test Set - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4920-01-517-8439

Storage Tempurature Range: 51.04-71.0 degrees celsius End Application: General aircraft Voltage in Volts And Current Type: 120.0 ac Product Name: Acide fuel quantity test set Functional Classification: Aa-9.3 Special Features: Battery or a.C. Powered Functional Description: Principle of Productions and Voltage: Single capacitance/resistance test set used on bench or flightline measurment of resistance, capacitance, and voltage; simulating tank unit zapacitance; compensator capacitance with dry fuel tank; calibration standard for the system and compensator capacitance Purchase description Special Test Features: Requires explosive atmosphere test requirements Rest Data Document: 181349-mil-pri-28800 specification (includes engineering type bulletins, brochures, etc., that reflect specification type data in specification ormat; excludes commercial catalogs, industry directories, and similar trade publications, reflecting general type data on certain servironmental and performance requirements and test conditions that are shown as "typical", "average", "", etc.). And 96906-mil-std-810 standard (includes industry or association standards, individual manufactureer standards, etc.). Shelf Life: Via Juit Of Measure: - Demilitarization: (*es - demilitini Filip: - 125000
End Application: General aircraft //oltage In Volts And Current Type: 120.0 ac //orduct Name: //orduct Name: //orduct Jeans Jean
