End Application:

Tf36

Specific Usage Design:

Used to check the air flow of the blade in accordance with the repair document

Nominal length:

11.000 inches

Product Name:

Fixture, air flow-stg 2 hpt rotor blade, trail

Nominal width:

5.000 inches

Nominal height:

5.000 inches

Functional Description:

Holds the blade, high pressure turbine rotor-stg 2, trail in position to check air flow

Reference Data And Literature:

Serd 6443

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
