End Application:

Tf-39 aircraft engine

Nominallength:

2.740 inches

Product Name:

Fixture, grit blast-hpt rotor blade stage 2

Nominalwidth:

2.190 inches

Nominalheight:

1.130 inches

Special Features:

Urethane material

Functional Description:

Used during repair of lead stage 2 high pressure turbine rotor blade ht90. Used to cover the dovetail during grit blasting process

Reference Data And Literature:

Serd 6448

Relationship To Similar Equipment:

4920-01-518-0025 is for trail

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
