End Application:

F-16c/d, r-iais

Special Features:

Mfg requested name - high speed data test set, c/o interface unit, cpu, storage unit, and mobile platform unit, height -20in, width 23in, length 33in, associated equipment- r-iais test station, modular receiver exciter, common radar processor, israeli color display processor, data transfer cartridge, and the data transfer cartridge receptacle

Functional Description:

Provides interface between f-16 lrus and r-iais test set

Reference Data And Literature:

Serd90a53

Supplementary Features:

Interface unit - provides switching capabilities and common interface for ethernet data, cpu - intel based unit testing fibre channel, ethernet, radar control interface and inphase and quadrature for lru's, storage unit for testing accessories and software

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
