End Application:

Electronic turning tool, p/n rc2000g02 cage 62340

Component Quantity:

1

Product Name:

Control unit- main, futuredrive

Special Features:

Not complete system; when ordering must specify serial number of drive motor - motor that is attached to auxiliary drive box; control unit is preprogrammed for specific aircraft turbine engines with microprocessor based system; controls engine blade and stage selection, turning speed, positioning, jog, and direction; backlit liquid crystal displa (lcd)

Functional Description:

Used to control movement of turbine engine blades for inspection purposes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T01200
