End Application:

C-17 acft

Product Name:

Kit, hoisting-obiggs ii heat exchanger/boost compressor

Special Features:

C/o block and tackle, 2 slings, asleeve alignment tool

Functional Description:

Used to raise or lower heat exchanger or turbocompressor into and out of its installation position in the forward main landing gear pod. Also used in installing the sleeves on the joint-between the obiggs ii heat exchanger and bypass head valve

Reference Data And Literature:

Serd no. 490129

Supplementary Features:

Nylon storage bag 18x18x18

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
