Mounting Type:

Bench

End Application:

F-16 r-iais

Portability:

Nonportable

Scale Calibration Method:

Dead weight

Criticality Code Justification:

Agav

Special Features:

Includes ieee488 interface (scpi version) and rear ps/pt connections.

Functional Description:

Used for the precision calibration/verification of aircraft pitot statistics; can monitor and control ps, pt, qc, mach, rate of climb, epr

Supplementary Features:

Front panel is rainproof. Dimensions: 19f x 10.5f x 12f.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T179-x
