Major Components:

Combination case, 2 transit cases, control panel/chassis, remote control unit, cable assemblies, cable adapters, accessories

End Application:

F-15e and f-15c (msip) aircraft

Material And Location:

Aluminum housing

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Test set for datalink and integrated defensive electronic countermeasures systems

Product Name:

Test set, aircraft pod interface

Special Features:

Combination case: 18.51 x 12.8w x 18.8h in, 60 lbs; transit case 1: 20lx 20w x 17.3 h in, 65 lbs; transit case 2: 26l x 13w x 13h in, 50 lbs

Functional Description:

Shall provide checkout and fault isolation of teh axq-14 and zsw-1 data link system on the f-15e aircraft weapon delivery system and checkout and fault isolation of the an/ale-5 (v)3 fiber optic towed decoy system on the f-15c (msip) and f-15e aircraft

Reference Data And Literature:

Serd 8651 rev e

Surface Treatment:

Paint

Surface Treatment:

Paint

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
