Width:

4.188 inches

Length:

8.625 inches

End Application:

Total aircraft

Electrical Power Source Relationship:

Self-contained

Internal Battery Accommodation:

Included

Test Type For Which Designed:

To detect presence of open circuit in electrical cable and measure distance to the fault in total inches, feet, or metric.

Product Name:

Esp plus refectome

Special Features:

256mb onboard waveform storage, locate fault up to 1000ft., english and metric display; no dc voltage produced by the esp meter; wires and cables connected to the esp meter through a single bnc-type connector, a 6-foot lead set (bnc-f to bcn-m) and an 8-inch lead set with alligator clips are provided with each meter; meter equipped with replaceable rubber boot; is a stand alone hand held device with a 6vdc lithium ion battery; operational environments -20 degrees c to +60 degrees c certified to military standard 810 method 511.3 standards for explosive environments; maximum ac output voltage output of esp meter is 2vac peak to peak

Height:

2.500 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
