End Application:

F110-ge-100 engine

Criticality Code Justification:

Feat

Product Name:

Fixture, storage-high pressure turbine no assembly

Nominaldiameter:

33.000 inches

Special Features:

Critical application to f110-ge-100 engine

Functional Description:

Used to maintain the circumferential position of inner and outer supports until positioned on next level of assembly

Unpackaged Unit Weight:

210.000 pounds

Reference Data And Literature:

Serd no. 3080a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
