End Application:

Fixture, engine maintenance, aircraft (4920-01-522-2393)

Nominallength:

7.380 inches

Product Name:

Locating bung

Nominalheight:

2.500 inches

Special Features:

Harden to rockwell "c" 40-45.

Functional Description:

Used to constrain the 4th stage turbine disk for inspection of front snap diameters.

Reference Data And Literature:

Serd 9861; 2j-f100-13-9

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
