End Application:

F118-ge-100 aircraft engine

Criticality Code Justification:

Feat

Nominallength:

7.500 inches

Product Name:

Fixture, front frame tube instal

Nominalwidth:

10.000 inches

Nominalheight:

4.600 inches

Special Features:

Aircraft engine usage

Functional Description:

Used to position the scavenge tube for welding the replacement fitting on the outboard end of the tube

Reference Data And Literature:

Serd no. 6491

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
