End Application:

F-15 aircraft fuel quantity indicating/gauging system

Criticality Code Justification:

Agav

Product Name:

Fuel quantity signal conditioner interface test adapter

Functional Description:

Used with benchtop reconfigurable automatic tester 105 (brat 105) to provide complete operational testing and fault isolation of signal conditioner 47131-001

Reference Data And Literature:

To 33d7-50-2799-2 (preliminary)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
